Overview

B&D Hairstudio is the presentation and booking website of a hair studio/barber in Hajdúszoboszló. A one-page static site: no server, opens in any browser, uploadable to any host.

The goal is a strong, modern first impression and a nudge toward direct booking. Mobile-first responsive, no build step and no framework.

Philosophy: fast loading, clean content, direct contact — no unnecessary technology.

Goals & audience

Audience

Local guests looking for a hair/barber service who want to book quickly.

Goal

Build trust by showing the work, and make booking/contact simple — with a single scroll.

Sections & content

SECTION	CONTENT
Hero	A large heading, the studio's mood, a booking CTA.
Services	The list of offered services.
Gallery	Photos of the studio's work in a grid.
About	A short intro to the team and the approach.
Contact	Contact details, social links, booking.

Gallery

The gallery shows the studio's work in a responsive grid; images appear on scroll (reveal animation) for an engaging browse.

Images live in the images/ folder, optimised for fast loading.

Booking & contact

Booking and contact are direct: guests book via the studio's Facebook and TikTok pages / messages. There is no backend and no own booking database.

This is the fastest route for a local provider: zero operations, with booking on the social channels already in use.

Architecture & tech

Client

Vanilla HTML/CSS/JS, a single page with smooth in-page navigation and scroll-based animations.

No backend

Static files; booking/contact via external social channels and direct links.

Google Fonts (Syne, Manrope, Space Mono); everything else local, no build step.

Responsive & accessible

Mobile-first, fluid layout: content stays readable at every size with no horizontal scroll; a hamburger menu on mobile.

Animations respect the `prefers-reduced-motion` setting; colour contrasts and focus states remain legible.

Appearance & motion

For a lively feel, a marquee ticker and reveal-on-scroll animations do the work; sections glide in gently while scrolling.

The vivid green accent and all-caps geometric headings give the bold, modern character.

Design system

A bold, modern identity — a light paper base, a vivid green accent, and geometric all-caps headings.

COLOUR PALETTE

	Green (primary)	#12b76a
	Green glow	#39e58a
	Deep green	#0a2c20
	Paper (base)	#f5f5f0
	Ink	#0e120f
	Line	#d8d8cf

Heading Syne · geometric	Body Manrope	Label / mono Space Mono
------------------------------------	------------------------	-----------------------------------

Components: green accent on buttons and highlights, thin rules, cards on the paper surface; a green glow on the emphases.

File structure

```
05_B&D; Hairstudio/  
├─ index.html  
├─ css/styles.css  
├─ js/script.js  
├─ images/           - hero + gallery images  
└─ dokumentumok/     - design doc (PDF)
```

Publishing

- Upload the folder to static hosting (Netlify / Cloudflare Pages / GitHub Pages).
- Check the social and booking links.
- Connect a custom domain (optional).

Future work

- Add an online booker (e.g. the Slotli widget).
- A price list and service details.
- A guest testimonials section.

Thanks to the framework-free structure, extensions can be added gradually.
